DEPARTMENT OF AGRICULTURE, MADRAS.

FOURTH OR FINAL REPORT OF THE COTTON CROP OF 1919-20.

(On an average of the five years ending 1917-18, the area under cotton in the Madras Presidency has represented 10·1 per cent of the total area under cotton in India.)

The total area sown with cotton in the Madras Presidency in 1919-20 is estimated at 2,332,300 acres against the last year's estimate of 2,117,800 acres. This estimate fell short of the actually recorded area of 2,171,7 0 acres by only 1·8 per cent. The present estimate represents a decrease of 26·6 per cent below this figure but even then it is greater than the area in 1914-15, 1915-16 and 1916-17. Last year, under the stimulus of record prices, the maximum extent was sown with cotton, especially Cambodia, regardless of rotations and in every kind of soil and the present decrease is therefore quite natural. The area in an average year is estimated at 2,303,040 acres.

2. The decrease is general and is due to the competition of food-crops which are fetching abnormally high prices, to fodder scarcity in the south, and to the falling price of cotton. The price of cotton (Westerns) fell from Rs. 400 per candy of 500 lb. in July 1919 to Rs. 351 in July 1919 and now stands at Rs. 280. The area in Coimbatore and in the 'Coconadas' tract is the lowest on record since 1907-08, the first year of complete agricultural statistics.

3. The season has been unusually late and the difficulty always experienced in trying to frame estimates of the yield is increased. Rains falling at the beginning of January caused considerable shedding of flowers and squares, and gave rise in places to rather alarmist reports, but the rains have refreshed the plant and though the season will be delayed and there is always some risk in this, it is now thought that the crop is anywhere permanently damaged. Reports from many parts are good and the acre yield is expected to be fully up to the average. The yield works out to 413,000 bales of 400 lb. each, a larger proportionate reduction than is recorded in the area. This is due to the reduction in the area sown with irrigated Cambodia, which is a heavy yielder. The yield in an average year is estimated at 441,850 bales.

4. The table below gives the yield of the crop of 1918-19:—

(Figures in bales of 400 lb. each)

Variety.	Cotton pressed at presses plus loose cotton received at mills from 1st February 1919 to 1st February 1920.	Yield as estimated in February 1919.	Yield as estimated in the season and crop report of 1918-19.
(1)	(2)	(3)	(4)
Tinnevelly	107,600	127,000	..
Bellari	8,400	12,400	..
Cambodia	191,300	212,600	..
Total South ..	307,200	352,000	344,200
Northern and Western	150 900	181,300	150,800
Coconadas and others	92,500	57,492	92,300
Grand total ..	542,600	632,800	587,300

To the figures in column (2) should be added an estimate of 10,000 bales for local consumption by hand spinners. Allowing for this and for arrears not furnished, the actual arrivals will amount to 520,000. A large amount of cotton is still held up in the districts, in the hope of better prices. From information available, this may be put at 43,000 in the case of Coconadas and 32,000 in the case of Northern and Western. A large amount is also held up in the south though it is not now possible to give figures. The estimate of Cambodia was undoubtedly too high, and was due to the serious havoc wrought by the Bollworm late in the season after the forecast was issued. On the whole however it is likely that the total yield may be put at 580,000. The estimate of the current crop represents a decrease of 29 per cent below this.

5. Figures by districts are given in the statement attached below.

Madras, 26th February 1920.

SECOND OR FINAL REPORT OF THE GROUNDNUT CROP OF 1919-20.

(On an average of the five years ending 1917-18, the area under groundnut in the Madras Presidency has represented some 7·5 per cent of the total area under groundnut in British India.)

The area sown with groundnut in the Madras Presidency in 1919-20 is estimated at 1,169,800 acres against last year's estimate of 852,300. This was 6 per cent below the actually recorded area of 1,240,778 acres. The present estimate represents an increase of 16 per cent over last year's actuals. It is however less than the area in any of the preceding years since 1910-11 except 1915-16. Even though the price of groundnut has risen from the prewar price of Rs. 42-8-0 per candy of 522 lb. to Rs. 77 at sowing time last year, the price now stands at about Rs. 75. This is due to the situation created by the low yield of foodcrops in 1918-19. The area is also less than the average of 1,464,800 acres by 21 per cent.

2. The increase this year in general except in North Arcot, Tanjore, Chingleput, Bellary, Nellore and Godavari. The decrease in North Arcot is due to the competition with gingelly, while the decrease in Chingleput is due to dry paddy having been sown in rainfed areas. The area in the Deccan was abnormally low last year and the pendulum is now swinging back.

3. The season has been favourable except in the Circars where the dry weather in the growing season followed by heavy north-east monsoon rains reduced the yield. The seasonal factor for the Presidency works out to 113 per cent of the average. On this basis a yield of 853,300 tons of nuts in shell is estimated against last year's final estimate in the season and crop report of 441,500 tons and an estimated average yield of 732,600 tons.

4. Figures by districts are given below :—

THIRD OR FINAL REPORT OF THE PADDY CROP OF 1919-20.

(On an average of the five years ending 1917-18 the area under paddy in the Madras Presidency has represented some 14·2 per cent of the total area under paddy in British India.)

The area sown with paddy in the Madras Presidency in 1919-20 is estimated at 11,797,300 acres against the last year's estimate of 9,711,000 acres. This was 7·2 per cent below the actually recorded area of 10,465,000 which was the lowest on record since 1911-12. The present estimate represents an increase of 12·7 per cent over last year's estimate. It is the highest area recorded since 1907-08, the first year of complete agricultural statistics. This is a natural result of the food shortage experienced owing to the reduced area and low yield of the previous year. The increase is general except in Ganjam where the South West Monsoon practically failed. The estimated area in an average year is 11,384,000 acres.

2. The crop is below the average only in the districts of Vizagapatam, Godavari, Kistna, North Arcot and Chittoor. Elsewhere good yields are reported while a bumper crop is expected on the West Coast. The seasonal factor for the Presidency works out to 103 per cent of the average. On this basis, the yield is estimated at 118,702,000 cwt. of cleaned rice as against last year's final estimate of 84,060,900 cwt. an increase of 41 per cent. The yield in an average year is estimated at 109,788,000 cwt.

Details by districts are given overleaf

Diet, perishable—consists of perishable articles of daily supply (supply to continue from 1st April 1920 to 31st March 1921). An indent for each day's requirements will be given to the contractor. Payment will be made on monthly bills.

Non-diet, perishable, surgical dressings, aerated waters, wines and spirits—consists of articles to be indented for in quantities as required. Payment will be made on monthly bills. Supplies to continue from 1st April 1920 to 31st March 1921.

2. The articles required are detailed in the classified schedule annexed and information as to samples, etc., may be had on personal application at the hospital.

3. A separate tender must be sent in for each article.

4. Tenders will be opened by the District Medical and Sanitary Officer at the appointed time in the presence of those interested who may choose to attend.

5. Tenders to be superscribed in the manner classified in paragraph 1 and on the covers the words "Tenders for hospital supplies" written. Each tender must contain not only the rates but the total value of each item of supply entered in a separate column, the items in which must be totalled up showing the aggregate value of each entire tender.

6. Each tender must be accompanied by a deposit (in Government promissory notes or bank receipt) as earnest money of the amount noted against each article. When several articles are tendered for, one bank receipt for the total amount of earnest money will be received. In default of such deposit the tender will be rejected, nor will any tender be received after the time fixed for the opening of tenders. No cash will be received. This deposit will be returned to unsuccessful tenderers immediately and to the others as soon as they have lodged the security mentioned in paragraph 8.

7. No person making a tender shall be allowed to withdraw his tender for the space of thirty days from the date thereof, and, in the event of his so doing, his deposit shall be forfeited to Government.

8. The successful tenderer must, within three days from date of receiving intimation that his tender has been accepted lodge security, viz., 10 per cent on the total value of the articles, failing which his deposit will be forfeited to Government. He should also pay the value of the proper stamp duty on the contract.

9. No advance of cash will be made to the contractor. Bills on presentation will be passed by the Treasury Deputy Collector, Trichinopoly, for payment at the Madras Bank, Trichinopoly, after delivery of the articles.

11. The contract must not be sublet. The contractor's security will be returned to him immediately on completion of his contract.

12. The District Medical and Sanitary Officer reserves to himself the right to decline or accept the tender for any one or more of the articles tendered for by the successful tenderer without assigning any reason for so doing. The District Medical and Sanitary Officer also reserves to himself the right of rejecting tenders without assigning any reason for so doing.

13. Government promissory notes lodged as earnest-money deposit for a period of twelve months or less shall not be endorsed over to the District Medical and Sanitary Officer, but shall remain in the name of the depositor. Government will appropriate or cancel the notes as per G.O. No. 2358, dated 1st March 1890, authority to that effect being duly entered in the contract or other document executed by the depositor.

14. With reference to the stipulations contained in the preceding paragraph 13, the tenderer should attach a certificate to his schedule or schedules to the following effect:—

15. Samples of diet—storable articles, surgical dressings only should be sent along with tender; other samples are not required unless called for. When called for they must be sent in within two days. If approved and tender accepted, the samples received will be counted as part of the supply. If rejected, the samples will be returned. Tenderers are distinctly to understand that, if the tender be accepted, the balance of the article or articles required must in every way be equal to the approved sample. The opinion of the District Medical and Sanitary Officer will be final on this point.

16. The number or quantity entered in this form of tender is the minimum quantity which the District Medical and Sanitary Officer undertakes to require to be supplied, but the contractor will be under an obligation to supply such larger number or increased quantity as the District Medical and Sanitary Officer may require him to supply.

The Collector of the district shall be the sole judge as to which lands are required for such purposes.

(*m*) Existing and customary rights to foot paths, beaty tracts, water courses, bodhies, etc., will not be affected in any way by the sale of the lands on which they are situated.

(*n*) Should it be found within three years from the date of confirmation of the sale that any land so sold is not irrigable or should the Executive Engineer in charge of the Divi Pumping Project declare that it is undesirable for any technical reason to irrigate any such land, the purchaser shall have the option of cancelling the sale and relinquishing the land. If he elects to cancel the sale and relinquish the land, the purchase-money shall be returned and thereupon the purchaser shall have no claim to any damages on account of the cancellation of the sale. The Standard Barometer and Thermometers are read at 8 a.m., 10 a.m., 4 p.m. and 8 p.m., and the daily means are obtained by the application of hourly corrections, deduced from twenty years' observations. The cistern of the barometer is twenty-two feet above the level of the sea, and the receiver of the rain-gauge is two feet from the ground. The wind, rain and general weather registered are for the current civil day—from midnight to midnight.

The total quantity of rain collected since 1st January is 5·66 inches, the average fall for the same period being 1·17 inches.

16. In sub-section (1) of section 4 of the Madras Impartible Estates Act, 1904, the following words shall be deleted, namely :—

"beyond his own lifetime."

STATEMENT OF OBJECTS AND REASONS.

Clauses 2 and 16.—It is part of the accepted policy of Government to protect from disintegration and to preserve as far as possible the ancient zamindaris in the Presidency. With this object it is proposed to insert in the Madras Court of Wards Act, 1902, a provision enabling the Government to take under management the estate of any zamindar who is found to be pursuing a course of reckless extravagance. It is also proposed to amend the Madras Impartible Estates Act, 1904, by making it impossible for the proprietor of an impartible estate to alienate his estate or a part thereof or bind it by his debts even during his lifetime.

The opportunity has been taken to make provision in the Court of Wards Act, 1902, for the Court of Wards to exercise certain necessary powers and to carry out certain other amendments of minor importance, as explained below :—

Clause 3 of the Bill enables the Court of Wards, with the sanction of Government, to take charge of the person or property, or both, of any minor or disqualified member of a disqualified proprietor's family, who has a vested or contingent interest in or a chance of succeeding to the property of such proprietor.

Clause 4 provides for the Court of Wards being guided by the provisions of section 17 of the Guardians and Wards Act, 1890, in appointing guardians for its wards.

Clause 5 provides an express remedy in the event of a ward who has been placed under a guardian disobeying the guardian's instructions as to his residence or movements and leaving, or being removed by others from, the custody of his guardian.

Clause 6 brings Court of Wards' servants within the meaning of the term 'public servants' for the purposes of the Indian Penal Code.

Clause 7 enables the Court of Wards to grant advances from estate funds to co-operative societies formed for the betterment of the social and economic conditions of the ward's tenantry.

Clause 8 is intended to enable the delegation to Collectors of the power of passing final orders on claims within prescribed limits.

Clause 9 is intended to dispense with the sanction of the Government of India for the publication of notifications transferring civil court decrees against estates under the management of the Court of Wards to District Collectors for execution and for the rescission of such notifications.

Clauses 10 to 12 are intended to relieve the Court of Wards and its official agents from liability to be made parties to suits relating to religious institutions as the guardians *ad litem* of wards and to enable it to meet out of trust funds the costs of suits relating to trust institutions.

Clause 13.—It is sometimes necessary to take over an encumbered estate as a matter of urgency in order to prevent its being broken up in consequence of the execution of decrees and it is not possible before taking control to make certain that there is any hope of extricating the estate from its encumbrances. The intention of the existing section is to give a period of two years for inquiry before the taking under management is confirmed. The provision has not been found workable in practice, because in cases of large estates, the management of which is complicated, or cases in which debts are concealed, it is sometimes found, after the period of two years has expired that there is no real hope of extricating the estate. In such cases the Court is committed to a long period of management from which no good can result. It is, therefore, proposed to adopt the practice in force in all other provinces of allowing the Government power to release the Court from management where it is found even after the expiry of the two years' period that it cannot be continued profitably to the estate.

Clause 14.—The addition appears to be necessary in order to provide for the intervening period between the death of one proprietor or cessation of guardianship and the decision as to whether management is to continue. No practical difficulties have arisen, but it seems desirable to legalize the acts of the Court during such a period.

Clause 15.—The Court of Wards may for the first time have to incur expense on account of property under its charge after the release of the property and it is necessary to provide for such cases which are not clearly covered by section 60. Provision is also made for the recovery of charges incurred on account of a ward either before or after the release of his person from the Court's superintendence.
